

Used machines in premium quality from the manufacturer

Putzmeister

Putzmeister Used Machine Park in Gründau near Frankfurt / Germany – the place for used concrete pumps in Europe

Buying a used machine is a matter of trust – rely on the specialists

It is much more difficult for a buyer to evaluate a used machine than a new one. Why? Because besides technical expertise, a detailed knowledge of design, components and control systems is also necessary, at a level that is unique to the manufacturer himself.

Therefore, used PM machines can only be thoroughly checked and repaired by Putzmeister themselves. This means that customers know what they are getting for their money. They can rely on the used machine just as if it were a new one.

There are many good reasons for buying a used Putzmeister machine

- The vehicle (MB, MAN or other) is tested at a specialist workshop and, where necessary, is overhauled, and has technical inspection certificates (TÜV, AU, etc. where required).
- The concrete pump structure is inspected, including the inside and/or non-visible areas, where possible. This is the basis for the subsequent repair
- Wear parts with more than 50 % wear are replaced (delivery line, spectacle plate, etc.)

For example:
A PUMI 24.87 S comes to the
Putzmeister factory for check and
restore the condition ready-to-work

- Operating materials are tested (hydraulic fluid check) and changed depending on their condition
- Delivery pistons are generally replaced, drive cylinders sealed, radio equipment is tested, etc.
- Refits are carried out and updates to technically compatible software are performed
- Standard accessories are checked and supplemented
- Final acceptance is similar to that of a new machine (manufacturer inspection)

The hopper and agitator are cleaned,
the agitator motor is sealed

Necessary welding is performed by
certified welders

Delivery pistons and filters are
replaced,
the drive cylinders are resealed

After readjustment, inspection and
retrofitting to the ready-to-work
condition the PUMI can be delivered

Used machines from the manufacturer represent value for money

Find out for yourself whether a reconditioned machine from our factory is right for you:
